OKW's Fast Assembly TOPTEC Enclosures

OKW's TOPTEC cases offer time and cost savings through fast and secure screw-less assembly. These modern enclosures can be used for housing desktop or wall mounted systems, and can provide an individual appearance.

The TOPTEC cases have a universal design, which is suitable for electronic and electro-technical devices as well as control systems, such as signalling equipment, computer peripherals, etc.

Seven standard sizes are offered from 123x68x30mm to 194x115x68. Each case includes mounting pillars for PCB's in the top and base. End panels are available with or without ventilations slots, and the recessed top section is ideal for locating a membrane keypad or polycarbonate product label.

TOPTEC cases are moulded in ABS (UL 94 HB) in two standard colour combinations - off-white, with the end panels in pebble grey, and all black. A useful range of accessories includes wall mounting elements, PCB screws, and non-slip feet. Volume prices start at £7.

OKW also offers a full customizing service on these enclosures with milling, silk-screen printing and much more, providing a fully finished housing ready for mounting the electronic components.

More information on these enclosures can be found on OKW's website at **www.okw.co.uk/toptec**
