Clip-on Ergonomic Hand-Held Cases from OKW

OKW has extended its ground breaking ERGO-CASE line of enclosures with new models which have an integrated belt/pocket clip. The ERGO-CASE system offers a unique range of contoured hand-held enclosures which have been designed for easy use in the hand, plus comfortable wearing on a belt, or strapped around the waist or arm. These 'body-hugging' enclosures are ideal for medical and mobile instrumentation.

In addition to the existing eyelet and belt/arm strap accessories, and following customer demand, OKW have introduced simple, tough and low cost and belt/pocket clips which can be easily mounted onto the ERGO-CASE types 'S' and 'M'.

ERGO-CASES are moulded in ABS (UL 94 HB). The standard colours are off-white RAL 9002 or black RAL 9005. The top and base parts clip together and are secured by two self-tapping screws. The base part includes an access plate and aperture, into which can be fitted three types of battery cradle for 4 x 1.5V AA, 1 x 9V or 2 x 9V cells.

The cases can be sealed to IP 54 for outdoor use, and have a recess in the top for mounting membrane keypads. The front end is ideal for fitting cables for probes or sensors. Internal pillars provide mounting for PCB's. ERGO-CASES are available in six standard sizes with external dimensions ranging from 80x96x32mm to 150x200x69mm. Volume prices start at £6.50.

OKW also offers a full customising service on these enclosures with milling, silk-screen printing and much more, providing a fully finished housing ready for mounting the electronic components.

More information on these enclosures can be found on OKW's website at **www.okw.co.uk/ergo**
