

INPUT SYSTEMS

Through our cooperation with the well-known manufacturers **HOFFMANN & KRIPPNER** and **TES FRONTDESIGN**, we are able to offer a complete range of solutions, e.g. for remote control units, machine control systems, medical equipment (disinfected applications), electrical household appliances and peripheral equipment etc.

High-quality materials, adapted to the application fields, ensure a high utility value as well as safe and reliable use.

- **Membrane keyboards:** Membrane keyboards with/without metal domes for tactile response, with/without integrated LEDs, various key forms and types of embossing, flexible connection systems, with/without EMC shielding, individually printed, combination of display and touch elements etc.
- **Touchscreens:** Complete, modular systems
- **Installation:** Bonding of membrane keypads and touchscreens
